

Desktop Analytics Program

Autodesk Desktop Analytics Program helps us understand how our customers use our products and services so we can personalize user experience and build better online mobile, and desktop applications. By analyzing usage trends and patterns we can optimize current features, make positive changes for future releases, provide more useful communications, and improve performance and quality.

If this is the first time using an Autodesk product that supports data collection, then an information dialog is displayed when Katana starts.

After that you can access the shelf script here:

You can decide to opt-in here:

 Autodesk Analytics Program ? ✕

Data collection and use

Autodesk analytics programs help us understand how our customers use our products and services so we can personalize your experience and build better online, mobile, and desktop applications. By analyzing usage trends and patterns we can optimize current features, make positive changes for future releases, provide more useful communications, and improve performance and quality. You may opt out of data collection in desktop products for Autodesk analytics programs by unchecking the box below.
